### **DETAILED ACTION**

### Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on January 15, 2001 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

# Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35
 U.S.C. 102 that form the basis for the rejections under this section made in this
 Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Kuan et al (US 5,757,954).

As to claim 1, Kuan et al disclose a method for detecting an object image within image data comprising; receiving image data (fig.1, element 516);

Segmenting the image data into multiple windows (fig.4);

Determining likelihood that each window contains the object, and probability rank ordering the multiple windows based on the step of determining (column 4, lines

Application/Control Number: 09/976,040

Art Unit: 2625

27-41); and selecting a predetermined one of the multiple windows as a window wherein the object image is considered to reside (column 4, lines 27-41).

As to claim 16, Kuan et al disclose a target detection process comprising:

Acquiring image data; down-sampling the image data n-times (column 6, lines
41-44); processing the down-sampled image data for detecting at least one of a
light target and a dark target (column 7, lines 21-33 and column 7, lines 44-50);
Labeling subsets of the image data that may contain target data and rejecting
clutter associated with these subsets of the image data (column 6, lines 49-52
wherein morphological operation remove isolated noise like pixels);
Combining results of the image data that has been down-sampled (column 12,
lines 35-40); and forwarding combined results to a decision-making authority.

## Allowable Subject Matter

4. Claims 2-15 and 17-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### **CONTACT INFORMATION**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barry Choobin whose telephone number is 703-306-5787. The examiner can normally be reached on M-F 7:30 AM to 18:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bhavesh Mehta can be reached on 703-308-5246. The
